AI Clinical Diagnostic Report

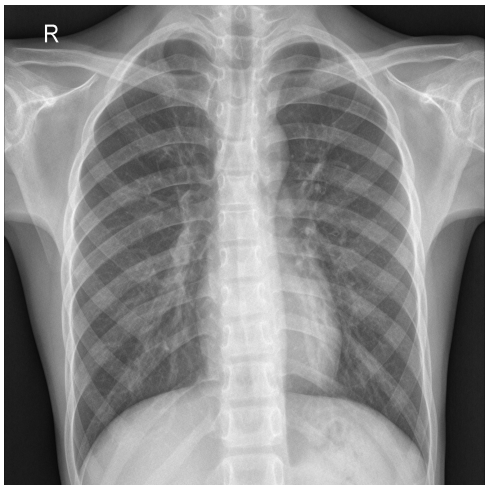

Chest X-Ray Pneumonia Screening System

Diagnostic Result:	**Normal**
Confidence Score:	90.61%
Status:	Review Required by Physician

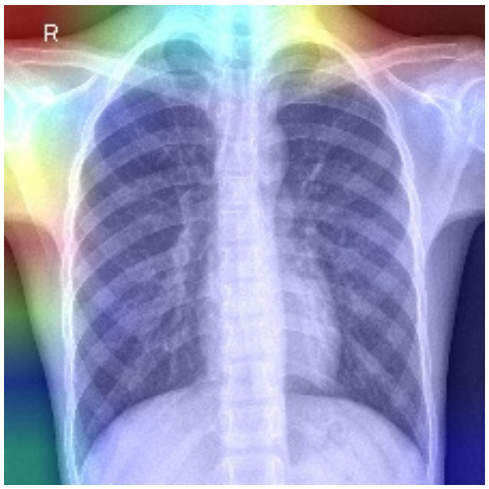

Clinical Image Analysis & Findings

The deep learning screening model evaluated the chest radiograph and classified the scan as **Normal** with a confidence score of **90.61%**. The lung fields appear clear without significant focal consolidations, interstitial markings, or pleural effusion. Routine follow-up is advised if symptoms persist.
